Experience

Product UX/UI Designer / Buildertrend
Apr 2022 - Nov 2025

- Led end-to-end product lifecyce across iOS and web, delivering insights and data that shaped product and design decisions, driven by insights from qualitative and quantiative data that reduced churn by 33%.
- Engineered a high-velocity "Build Day" workflow featuring keyboard shortcuts, automated SMS notifications, and an AI-driven builder-client workflow that improved completion time by 97%.
- Translated complex, ambiguous B2B workflows into intuitive user experiences, architecting project roadmaps that increased time-to-task by 42%.
- Optimized discovery and production by designing and contributing to a scalable Figma component library, boosting design-to-dev handoff speed, and improving production processes.
- Partnered with Engineering and PMs to define and influence product roadmaps, translating business objectives into high-signal, user-centric design solutions that considered and addressed edge cases, loading states, and empty states.
- Synthesized qualitative user feedback by establishing a Customer Advisory Board (CAB) to create a continuous feedback loop, directly accelerating product cycles and ensuring design solutions are grounded in deep user empathy.
- Championed WCAG accessibility standards within design for consistent use across all channels, empowering every user to seamlessly interact with B2B SaaS solutions while upholding a high-end, cohesive brand experience.

Product UX/UI Designer / RoomSpark
Sep 2025 - Present

- Directed product strategy and design for an AI-integrated interior design platform, leading a cross-functional team through the full product lifecycle from initial concept to MVP.
- Architected a full UI kit and comprehensive design system from the ground up, ensuring consistent brand application and component reusability across web and mobile platforms.
- Conducted iterative usability testing and accessibility audits to ensure the platform meets WCAG 2.1 standards for inclusive digital experiences.
- Led the discovery and research by identifying core user pain points, translating qualitative feedback into a prioritized product roadmap focused on high-impact features.
- Produced high-fidelity wireframes, interactive mockups, and prototypes in Figma, facilitating rapid testing cycles and aligning stakeholders on technical feasibility and user flow.
- Conducted comprehensive audits and competitor analysis to evaluate and implement AI tools, optimizing run speeds and quality assurance to deliver the highest-performing solution for our product roadmap.

Marketing UX Designer / CoConstruct
Feb 2021 - Apr 2022

- Engineered data-driven web pages from growth strategies, optimizing assets and SEO to achieve a 46% week-over-week increase in page views.
- Acted as lead web UX/UI designer for creative development, transforming campaign goals into delightful visual content using brand standards and assets.
- Worked in collaboration with the marketing team and stakeholders to align on go-to-market strategies and align web pages with the product releases to inform and drive user retention.
- Spearheaded a complete branding and UI overhaul for the marketing website and assets, increasing time-to-production, faster development and improving UX.
